[Install Icecast Centova Cast Cracked](#)

The screenshot displays the Centova Cast web interface. At the top, there's a navigation bar with 'EURO TI HOST' and a 'Configuration' link. Below this, a sidebar on the left contains various icons for 'Geral', 'Configuration', 'Estadísticas', 'Server', 'AutoDJ', and 'Session'. The main content area is titled 'DJ Management' and features a table of 'DJ Accounts'. The table has three columns: 'Real name', 'Usuário', and 'Status'. It lists two accounts: 'DJ 01' and 'DJ Euroti', both with a status of 'Ativado'. A 'Create DJ account' button is located to the right of the table. At the bottom of the interface, a footer indicates the user is logged in as 'EuroTI Host (Client)' and provides version and copyright information.

Real name	Usuário	Status
DJ 01	001	Ativado
DJ Euroti	euro	Ativado
